With the addition of the Waypoint Management software, the "Export All Nav Data" menu disappeared but was replaced with the ability to either export all Nav Data (waypoints, routes and tracks) as before or to select to only export those waypoints, routes and tracks that we want to export. This document deals with the exporting of all Nav Data.

Select An Item To View Information

Once you have selected "Export", you should see the message above that will ask you to confirm that you want to save the Nav Data you selected. Use the Right Arrow to select "Yes" and confirm that this is what you want to do. You should see a brief message that the Nav Data was sent to the memory card. Your selected Nav Data should now be on the memory card in your unit.
