When I open the R00001/R00002 etc folders these are the files it contains. As they are not a .dat file the Humviewer cannot see them. Therefore I need to find something to convert the .idx and .son files INTO .dat files before the Humviewer can see or play them.

B000.idx   B000.SON   B001.idx   B001.SON   B002.idx   B002.SON   B003.idx   B003.SON
