

Member News – May 2009

Welcome to the first Newsletter from the HBSI Forums at SideImagingSoft.com. I hope to make this a monthly event that will include forum updates, Article Submissions and a Tips and Tricks Section. Thank you to all the new members who have shown your support and are helping to make the new forum a success. We now have over 220 members and growing every day.

There have been a lot of features added over the last couple weeks and I wanted to make sure everyone is up to date with some of them and their benefits.

One of the biggest features has to do with the download section. This is an area just for registered members and you will have to be logged in to see the updates and downloads. We are proud to have this section and from what I know are the only forum on the web that has all of these files in one place!

Here are some of the features we have added:

Firmware Updates: Now you can download the latest Humminbird Firmware updates from the Download Section as well as past Firmware versions for those who may need to install an older update or do not like the current firmware version features.

Humminbird PC Download: Download Current and previous versions of Humminbird PC in the Download Section.

Email Notification of New Firmware Updates: As a member you will automatically be notified when Humminbird releases new firmware updates. When we know, you will know!

Personal Gallery Image Upload: Now you can upload your images to your own personal Gallery for storage. There is no limit to the number of images you can upload, we just ask that they all relate to the use or installation of Humminbird Side Imaging or other Humminbird Products.

Automatic Video Embedding: Now you can embed your links to almost any video on the net without having to know BBCode or using the BBC buttons. Just cut and paste the video link at the beginning of a line and it will automatically embed the video in a flash player.

Article/Tutorial Submissions: I have set aside a special section for Tutorials and Articles on Humminbird Side Imaging, Fishing or other related products. I think this would be a great addition for others to see video demonstrations and articles on how to use and install the Humminbird products. Keith Council with Humminbird has submitted quite a few so far and I look forward to getting a few from other members as well.

Personal Profile Fields: I have also made some changes to the Personal Profile. There is now fields for Humminbird Unit Owned, Firmware Version, and Accessories Installed. It will show under your Avatar in your post and on your Ultimate Profile. You can see an [example of this here](#).

I look forward seeing you all on the forum!
